Laurens County EMS takes the safety of the citizens and visitors to Laurens County seriously and we also know that it is of paramount importance. While the placement of ambulance's throughout Laurens County is important, Laurens County EMS must weigh every option regarding not only the safety of the citizens and visitors, but that as well of the employees who work for EMS. No one at Laurens County EMS takes their responsibility lightly, and we operate with the idea and belief that every life is important, and every citizen deserves the same service.

The Clinton ambulance was temporally relocated to the Joanna station until the air conditioner could be repaired or replaced by the City of Clinton. It is the understanding and belief from officials within the Clinton Fire and Police department that the issue has not been rectified, they have established a plan and received approval to move forward with the replacement of the HVAC system which should be completed by the end of June, 2019. This relocation has nothing to do with the location of the crew quarters within the current Clinton FD. The ambulance will be back soon, we are looking at and have been trying to find a better location for the unit while the repairs/replacement take place.

The citizens of the City of Clinton are just as important as the citizens of Joanna, Cross Hill, Renno, or Mountville. A citizen in Mountville deserves the same services that are provided to the Cities of Laurens and Clinton. We base the location of our units on call volume not on who is more important. Here at LCEMS we treat each citizen the same.

Deputy Director 864-984-0577, Training Office 864-984-1574, Shift Captain 864-984-0619
